WITCHAVEN II

Blood Vengeance

Installation Instructions

Inventory:

The following items are included with Witchaven II:

- One (1) Witchaven II CD-ROM
- One (1) Manual
- One (1) Install Guide
- One (1) Registration Card

Minimum System Requirements:

Computer: IBM 486/66 Mhz; MS-DOS 5.0 2X CD-ROM. (Pentium Recommended for SVGA mode)
Memory: 8 MB RAM
Video Card: VGA or SVGA
Hard Drive: 62 MB free
Soundcard: Most major sound card supported
Players: 1-16 network play or head-to-head modem play
Controls: Keyboard, mouse, joystick & most major 3D headsets.

Running the Installation Program:

To begin installing Witchaven II onto your hard drive:

- 1) Insert the CD into your CD-ROM drive, and switch to the CD-ROM drive.
- 2) Type INSTALL
- 3) Follow on screen instructions.

Video Mode Configuration:

Witchaven II supports two video modes, 320x200 and 640x480. The 640x480 video mode requires a 512K Vesa compatible video card. A pentium is highly recommended.

What is a VESA driver and how do I get one?

VESA is a standard for programming SVGA cards. For most systems, it requires that a "VESA driver" be loaded on your system

before using any of the high resolution SVGA modes. Each SVGA card requires a custom VESA driver which is usually shipped with your SVGA card. If you do not have a VESA driver for your video card, refer to your computer's owners manual, video card manual or select a driver from the VESA directory on the CD-ROM.

Network Game:

Witchaven II supports one active, 2-16 player game on a LAN. An IPX or compatible network driver is required. For instructions on setting up the network game, please read README.TXT by typing README from the CD-ROM root dir.

Modem Game:

Witchaven II supports a head to head modem game at 9600 baud or better. For instructions on setting up the modem game please read README.TXT by typing README from the CD-ROM root dir.

How do I make Witchaven II run faster?

- 1) Set your screen resolution to 320x200.
- 2) Minimize screen size by using the "-" (minus) key while the auto map is off.
